Certificate No:

DECLARATION OF PRIOR KNOWLEDGE OF THIS HORSE'S CLINICAL HISTORY

To the best of my knowledge and belief, the practice **HAS** / **HAS NOT** provided veterinary care for this horse under the current ownership.

If the horse **has** previously been so attended, all clinical history, under the current ownership, should be attached to this certificate.

The clinical history for this horse **HAS** / **HAS NOT** been attached to this certificate.

Total number of pages of attached clinical history:

REPORT OF CLINICAL FINDINGS

Report continued on attached sheet <input type="checkbox"/> YES / <input type="checkbox"/> NO

EXAMINING VETERINARY SURGEON

Veterinary Surgeon's Signature: _____ Date of Signature: _____

Veterinary Surgeon's Name: _____

Address: _____

NOTES ON THE EXAMINATION

This clinical examination was carried out substantially in accordance with the standard procedure recommended by the "British Equine Veterinary Association (BEVA) / Royal College of Veterinary Surgeons (RCVS) Guidance Notes on the Examination of a Horse on Behalf of a Prospective Purchaser (amended 2012)". At the request of the Breed Society, the examination usually comprises either the first two stages or all five stages of the standard procedure, although the exact sequence of the various tests within the examination may vary.

IN NO CIRCUMSTANCES SHOULD THIS CERTIFICATE BE RELIED UPON AS ANY INDICATION OF SUITABILITY OF A HORSE FOR SALE OR PURCHASE.

NOTES FOR THE BREED SOCIETY

(A) IDENTIFICATION AND LEGAL OWNERSHIP
This certificate serves to identify the horse that was examined, but it is not the responsibility of the examining veterinary surgeon to ascertain that the declared seller has legal title in the horse.

(B) AGE
Without appropriate paper records from foal-hood it is not possible to confirm the age of a horse with accuracy. Estimates of age based on a dental examination are imprecise and unreliable and any age range shown on the certificate is approximate and based on opinion only. In the absence of documentary evidence, the term 'aged' may be used to refer to a horse considered after examination to be over 15 years of age.

(C) STAGES OF THE EXAMINATION
If any parts of the examination were omitted for any reason (see "Notes on the Examination" above), the incomplete examination will not have identified any clinical signs of disease, injury or abnormality that could only have been revealed by a part of the standard procedure that was omitted.

(D) ADDITIONAL PROCEDURES
The original records of any additional procedures carried out at the request of the Breed Society (such as radiographs, ultrasonograms & photographs), as well as the blood sample taken for medication analysis, are and remain the property of the examining veterinary surgeon.
